**For Safeguarding of Motor Vehicle:** To avoid further damage to your motor vehicle, avoid driving in water-logged area, where water height is above the center of the tire. In case the vehicle is submerged in water do not try to crank or push start the engine. Even one attempt can cause major damage to the engine. If water has entered the passenger compartment, do not turn the ignition "ON" that can result in short circuit in the electrical system.

**For Safeguarding of Property:** Ensure proper water drains, put barricades, close gaps or openings, move stock to safe place on a safe height, switch off the main electricity before leaving, secure asbestos, galvanized sheet, temporary structures properly.

#### Loss Minimization Measures:

1. Arrange drainage of affected premises, where water accumulation / rainwater damage, try to separate unaffected stock from damage stock to avoid further damage.
2. Drying of affected property if it can stop further damages to insured property.
3. Do not operate any machinery before drying if it is affected by rainwater, moisture.
4. Arrange basic safety measures in premises to avoid any further damages due to any event.
