

Group accident cover for kids travelling in school bus

DNA Money Correspondent correspondent@dnaindia.net

Mumbai: Bajaj Allianz General Insurance has introduced a group personal accident cover for school kids. It covers the kids during their travel hours in a pre-registered bus by school. By using Inter of Things (IoT), it tracks the bus and school kids providing real time location through GPS and beacons inserted in the identity cards of the children, said a press release issued by the company.

The policy provides cover against accidental Out Patient Department treatment and hospitalisation. Parents would be able to track the bus for pick up and drop on a mobile app, know the location of their kids with the help of beacons and attendance marking will also become automated. The premium cost depends on the coverage opted by the school. It will act as an add-on if parents already have a PA policy.
